It will be the tenth major episode of resident evil and the sequel resident evil 7: Biohazard. [1] The game was announced at the PlayStation 5 reveal event in June 2020 and is scheduled for release in 2021 for Windows, PlayStation 5 and Xbox Series X/S.[2] Synopsis The game is set a few years after Resident Evil 7: Biohazard. During Capcom's revelation, Kellen Haney told the story: Ethan's world suddenly comes crashing down again when Chris Redfield, an unexpected but familiar face makes an appearance, set off a chain of events that sees an agitated Ethan looking for answers to Chris's shocking actions, and eventually find him in a mysterious village. [3] The events will take place in Europe. [4] Like Resident Evil 7, the game was developed on the RE Engine and will be played from a first-person perspective. [3] The Resident Evil Village development was in development for approximately three and a half years prior to its announcement in June 2020. [4] Although Capcom is recognized as the eighth major game in the series, and its logo styled to include roman numerals VIII for 8, game producers Tsuyoshi Kanda and Peter Fabiano stated in a Famitsu interview that the name of choice was considered a village to be the next character in the game and because we would like players to understand that they reflected that in title stylization. They also avoided calling the game by a typical acronym (such as RE8) because they wanted players to remember part of the Village name. [4] [5] Notes ^ Stylized as VII.I.AGE RESIDENT EVIL. Known in Japan as Biohazard Village (Japanese: のハザーのィの, Hepburn: Baiohazādo Virejji), styled as VII.I.AGE BIOHAZARD. Reference ^ Yin-Poole, Wesley (June 11, 2020). Resident Evil 8: Village announced. It is a sequel to 2017 Resident Evil 7: Biohazard and was first announced at the PlayStation 5 development event on June 11, 2020. [3] [4] [5] A synopsis a few years after Resident Evil 7: Biohazard, Ethan Winters and his wife Mia have a quiet life, until the arrival of Chris Redfield, one of the famous protagonists of the series, who appears and somehow becomes responsible for reversing the then peaceful life of both characters. [7] During the presentation of the play, Capcom's Kellen Haney said that Ethan's world suddenly collapses again when Chris Redfield, an unexpected but familiar face, appears to unleash a chain of events in which Ethan finds himself agitated looking for answers to Chris's shocking actions, and eventually finding him in a mysterious village. [8] A game like Resident Evil 7: Biohazard, the game is developed in the RE Engine and will be played from a first person perspective. [8] Notes ↑ In the logo roman number VIII with the golden coloration highlighted in the word Village indicates that Resident Evil Village is Resident Evil 8, as confirmed by the game's own producers; is why they speak by them, for which they decided to choose the Village as part of the name instead of numbers, it is because the village (in English, village), the main place in which the game takes place, are of great importance in practice.
